

ANAQUANT

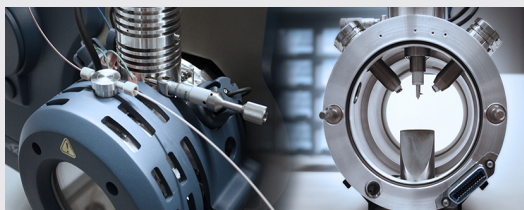

SOLUTIONS FOR BIOANALYSIS

A trusted CRO to speed up your R&D programs

Tanguy Fortin
Biotuesday

03/01/2017

ANAQUANT 'At a glance'

- ◈ Contract Research Organization
 - specialized in Bioanalyses (mAb, ADC, Proteins, peptides)
 - offering customized services in assay development and samples bioanalysis.
- ◈ Supports pharmaceutical and biotech companies to speed up their R&D programs with robust and validated analytical tools
- ◈ ANAQUANT was founded by Tanguy Fortin and Pr. Jérôme Lemoine in 2014 with more than 10 years of expertise in targeted proteomics analyses .
- ◈ ANAQUANT is based in the « Analytical Sciences Institute » building of Lyon.

3 offers to cover your needs

Biologics

ADCs characterization

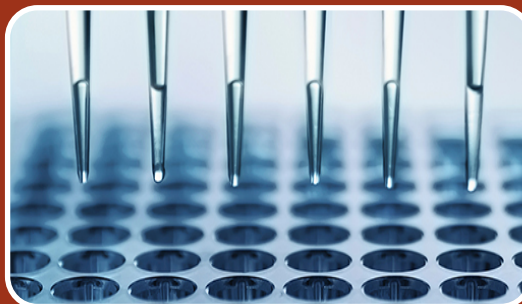

HCPs

PTMs

PKPD/DMPK

Quantification in
complex matrix

Biomarkers

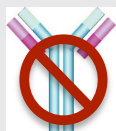

Customized
development of
Absolute and sensitive
quantification methods
in various biological
matrices

Bioanalyses

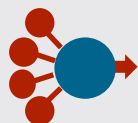

Routine bioanalyses of
your samples

Main advantages of our technology

Alternative to immunoassays/Cross validation

Multiplexing

Absolute quantification

Short assay development time

Minimal sample volume

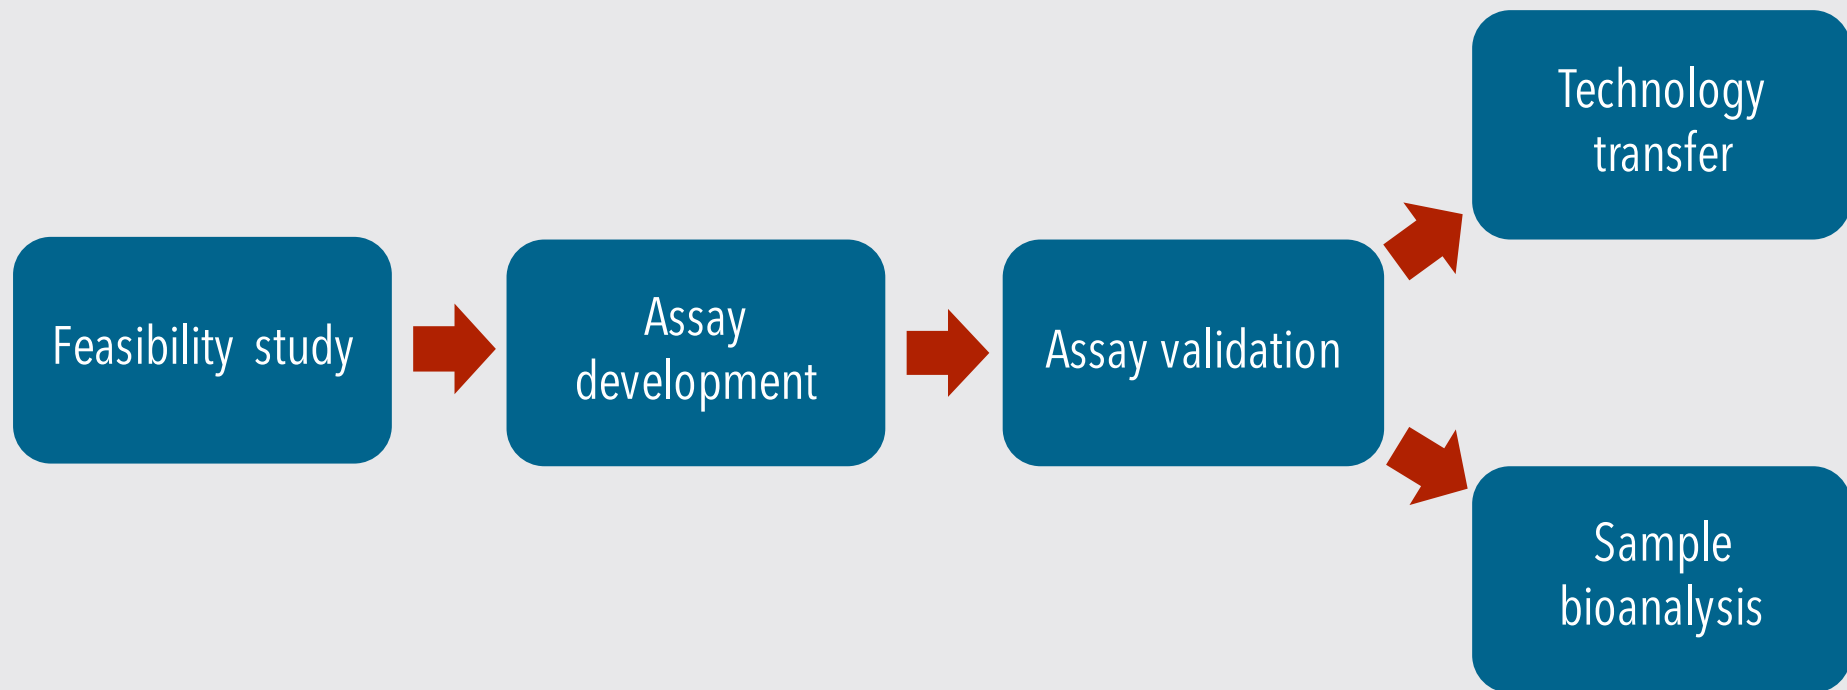

Biological complex matrices analysis (serum, plasma, urine, tissue)

Our know-how at your services

- Regarding your challenge, your concern, ANAQUANT answers with customized services.
- Milestones with Go/NoGo decision are established for each project to secure your budget.

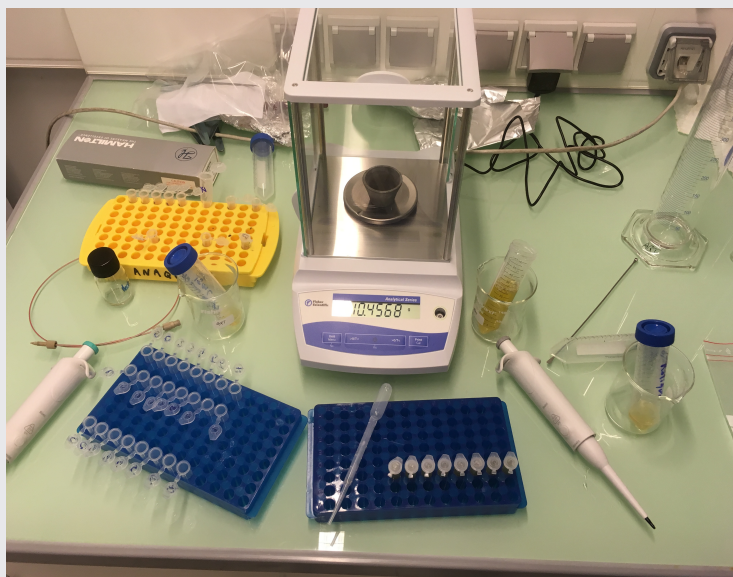

Customers needs-issues for sample preparation

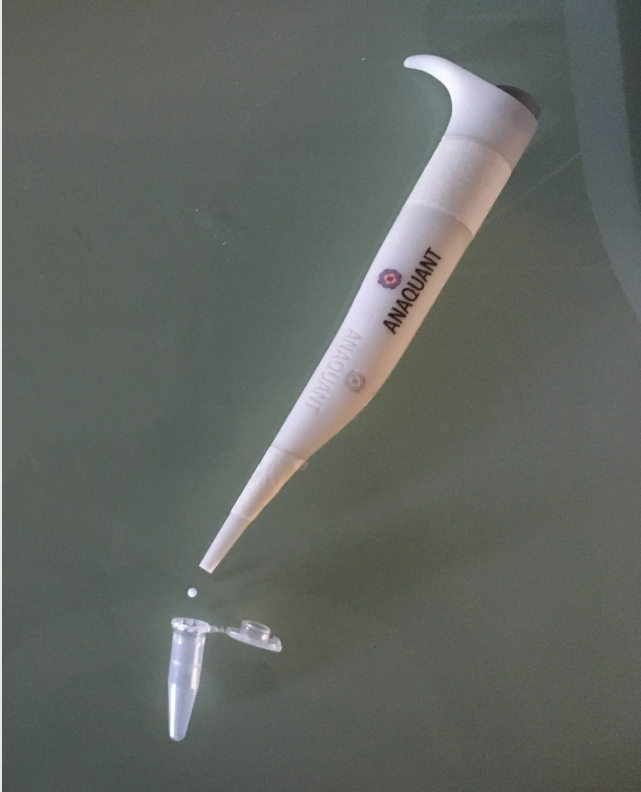

GENERATE RELIABLE STOCK SOLUTIONS OF MOLECULES IS

- User dependent
- Molecule dependent
- Time consuming
- Subject to stability issues
- Complex for a high number of molecules
- Subject to reproducibility issues

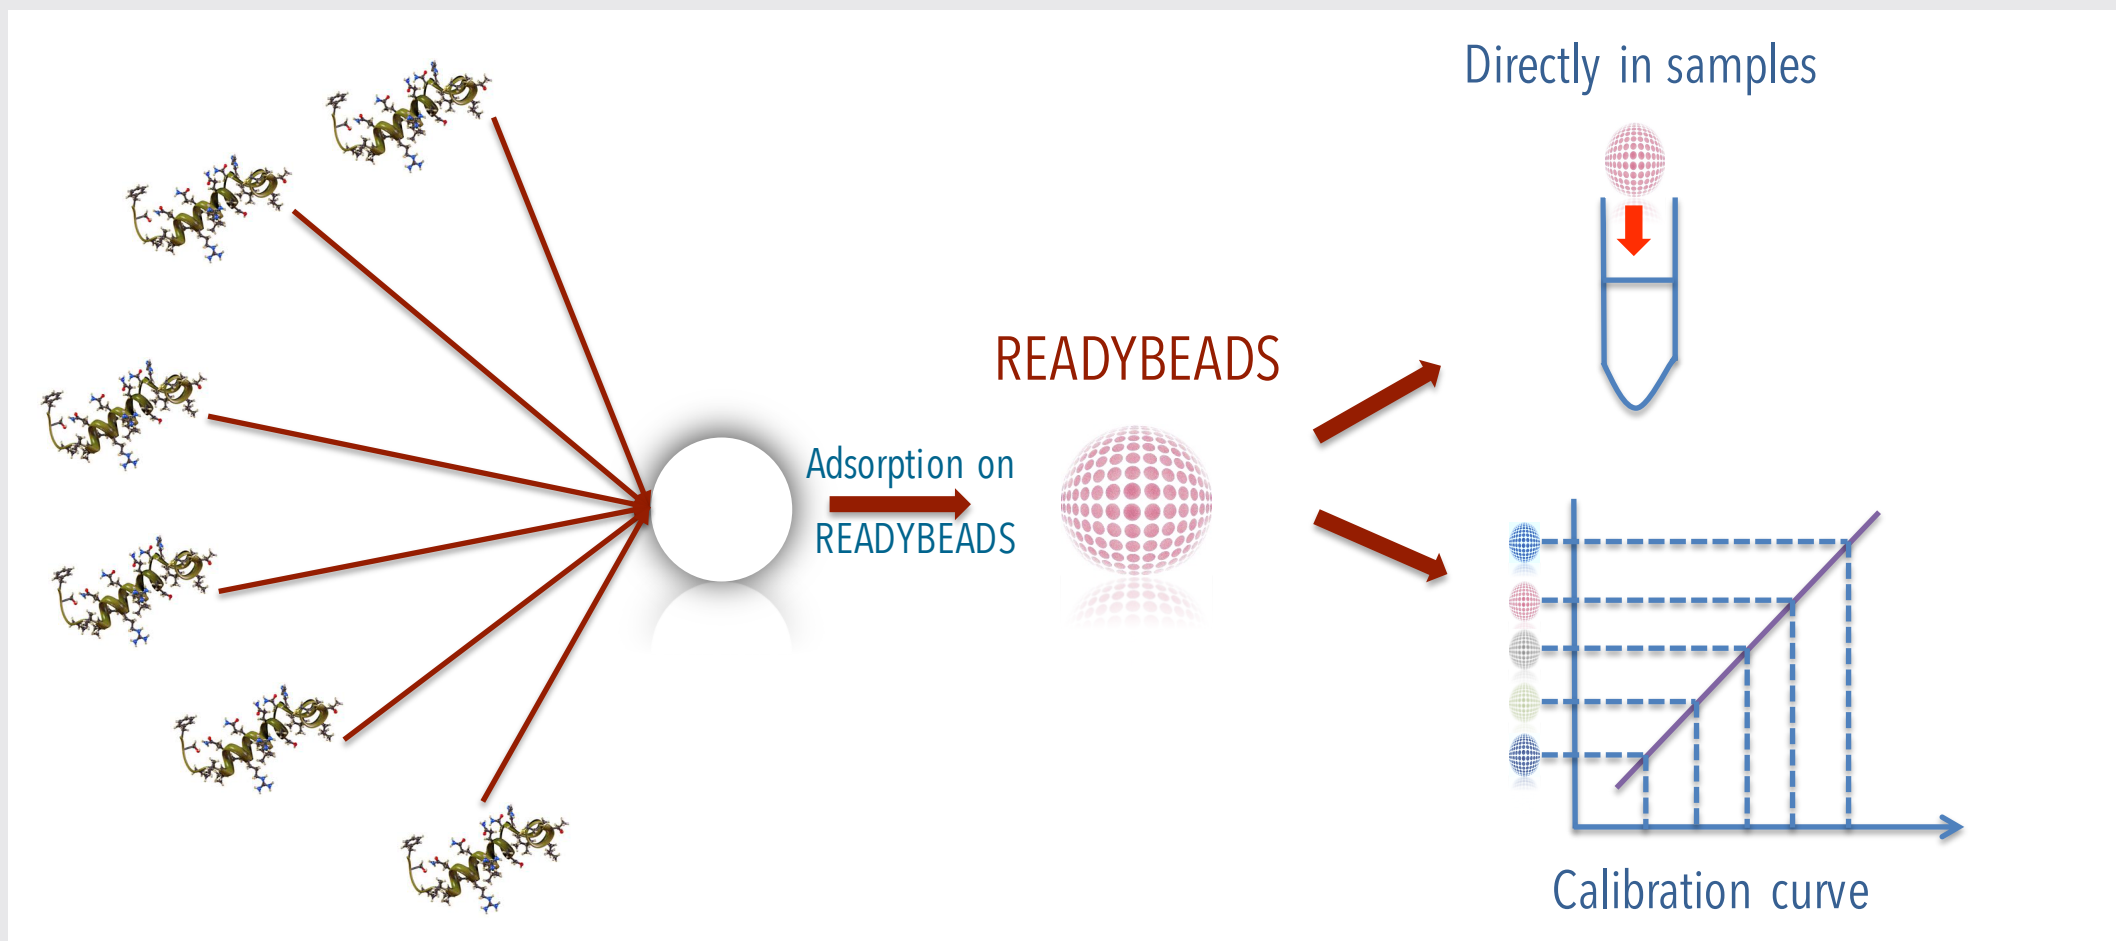

READYBEADS | A new concept for ready to use standards

WITH READYBEADS, GET ACCESS TO A READY TO USE APPROACH

- In One step
- Independent of the molecules
- Stable at room temperature
- As easy with dozens of molecules as with one
- Independent of the operator
- High reproducibility between beads
- Method transfer become easy
- Avoid weighing

How it works?

Applications and collaborations

APPLICATIONS

- Ready to use kits for mass spectrometry bioanalysis of small and large molecules
- Quality control of analytical systems
- Ready to use standards for ELISA analysis
- Ready to use standards for HPLC analysis

COLLABORATION

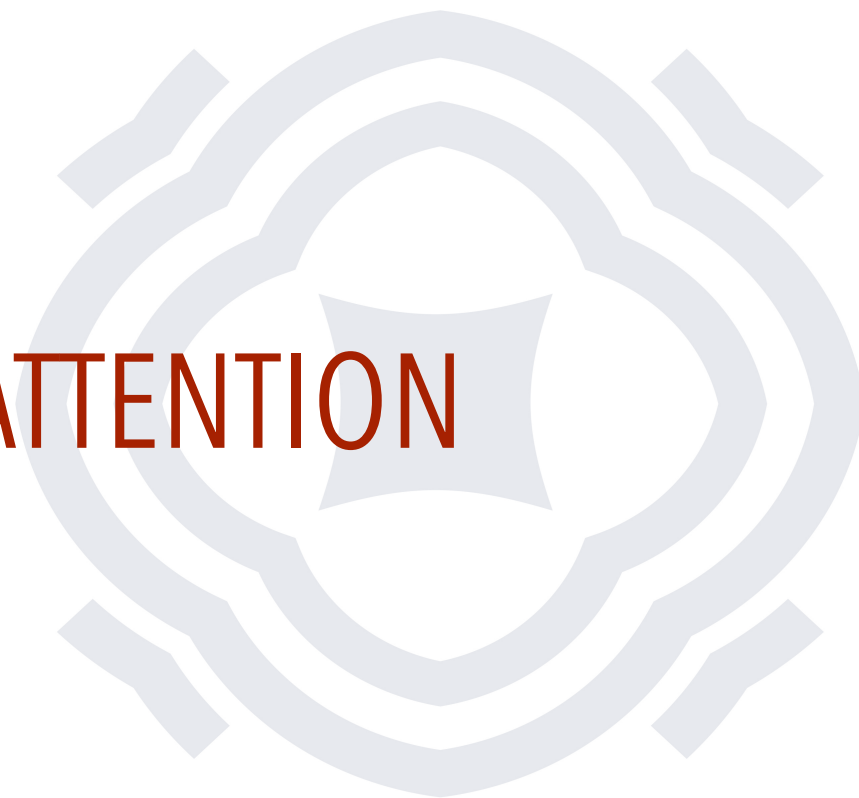

- We are looking for labs to develop Bioanalytical kits
