Overview of our services

Study design

Assay development and validation

Efficient study execution and data analysis

Sampling plans and logistics

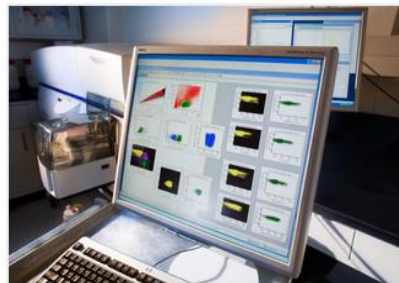

Integrated approach to utilizing multiple instrument platforms

Flexible options for alternative study approaches

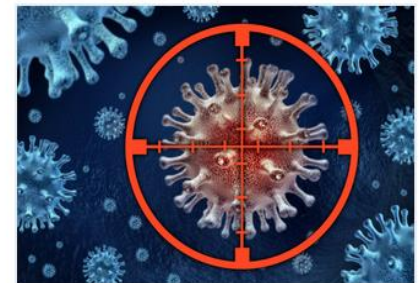

Soluble biomarkers

Immunophenotyping

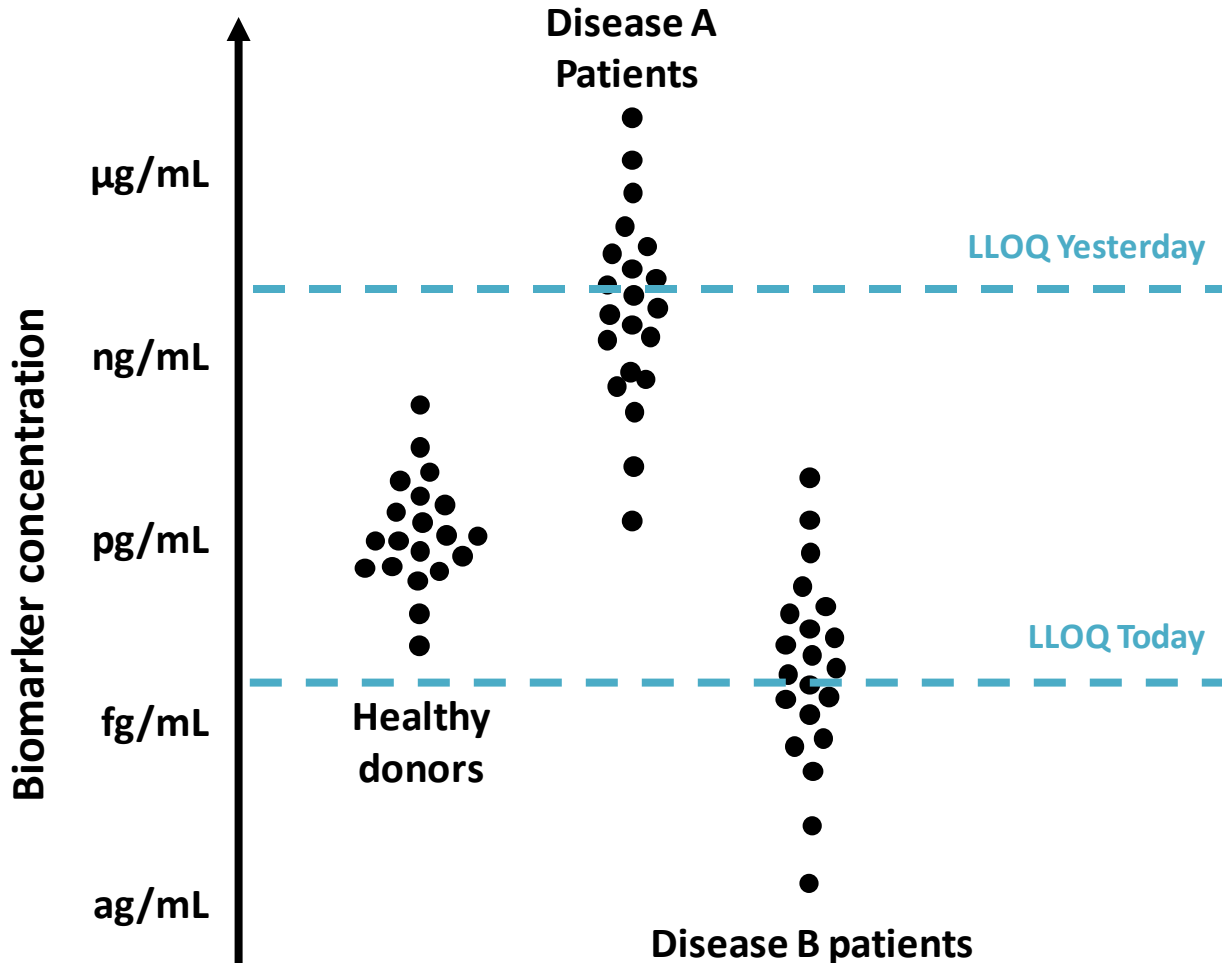

Functional assays

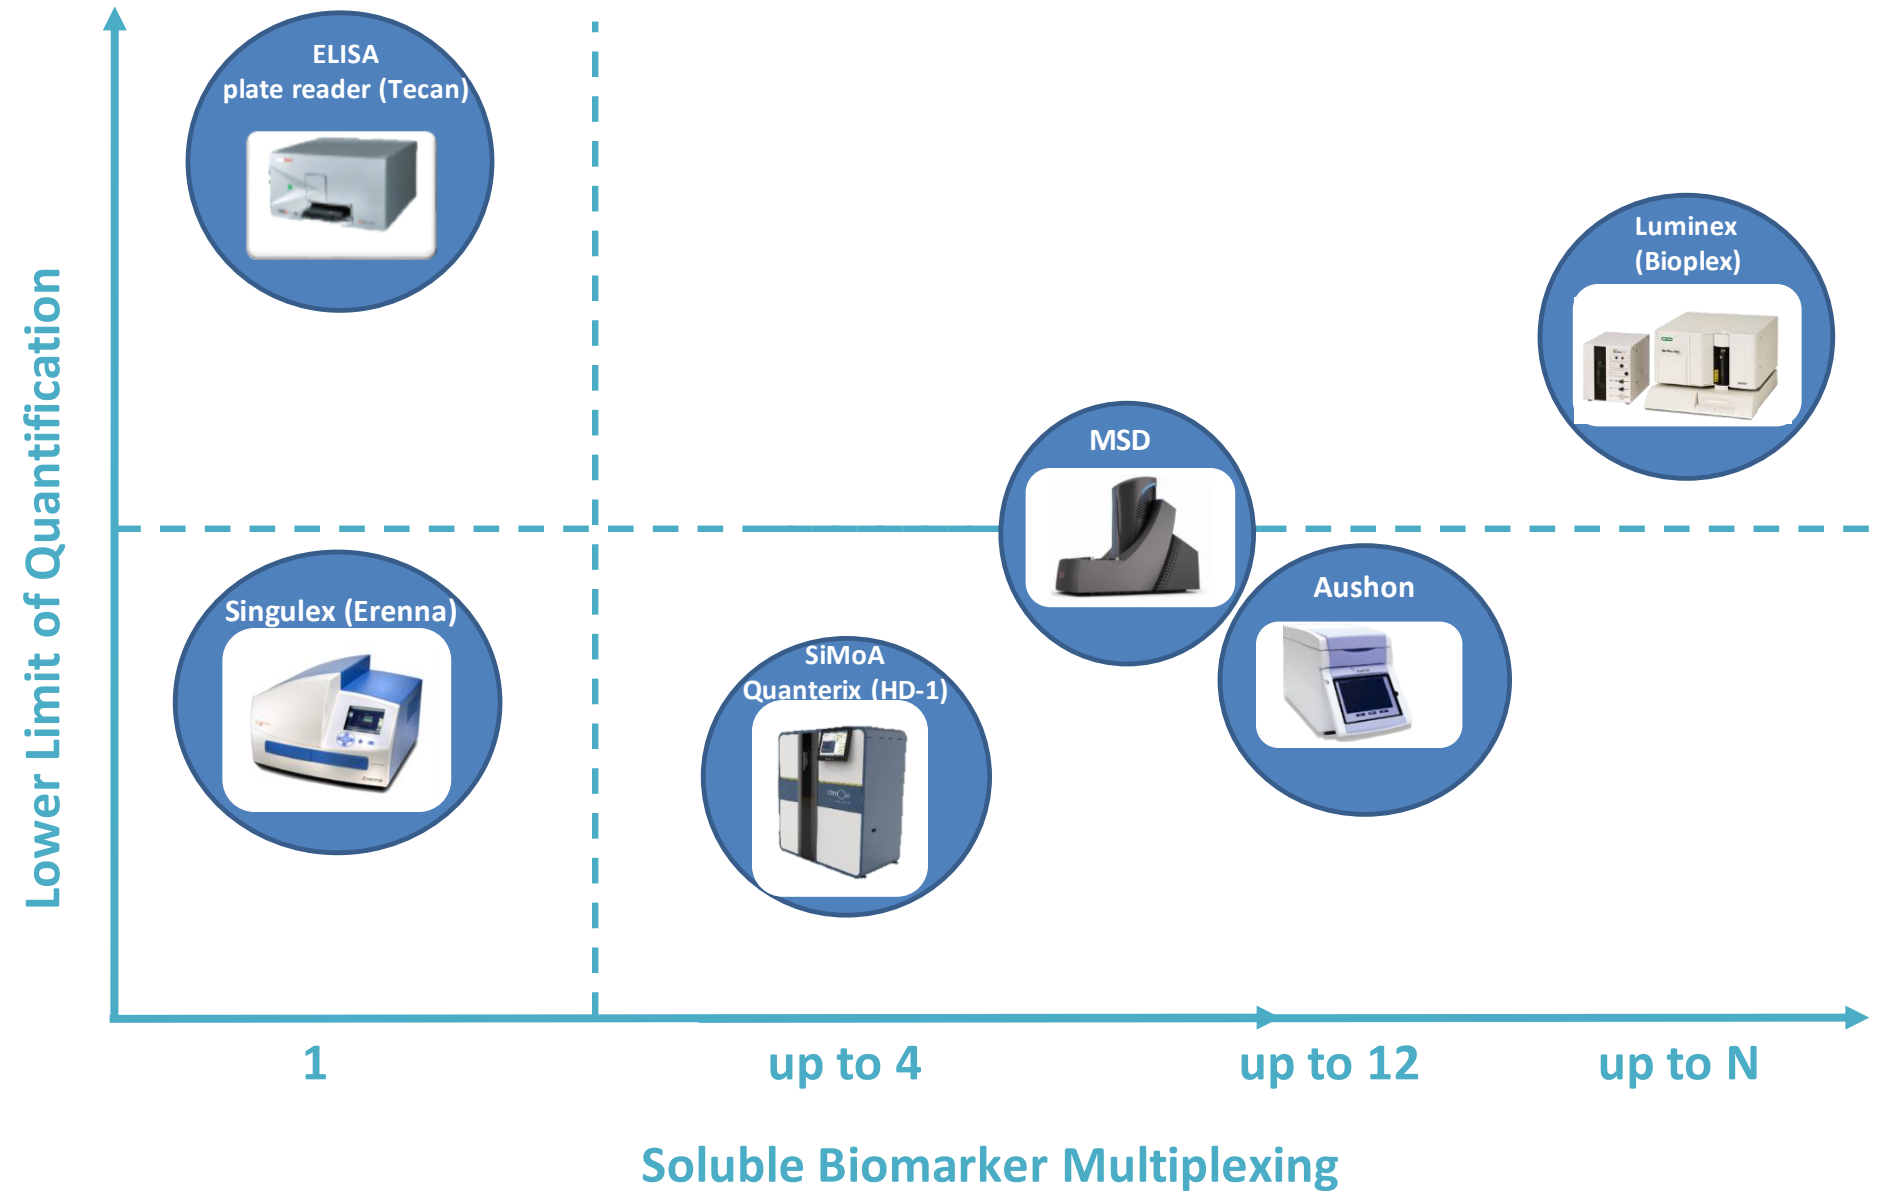

Drug-Target Interactions

Previously Undetectable, Now Quantified

Down to the femtogram/mL level!

The largest technology offer in Europe

High versatility

- SPECIES: Human, murine, NHP...
- SAMPLE type : plasma, serum, saliva, feces...
- INDICATIONS:

- ✓ Cancer
- ✓ CNS disorders
- ✓ Infectious diseases
- ✓ Inflammation
- ✓ Auto-immunity
- ✓ Allergy
